

NOTICE: ANNOUNCEMENT OF AVAILABILITY OF DRAFT WASTEWATER PERMIT

PERMIT NO: WA-002928-9

APPLICANT: City of Bremerton
345 – 6th Street, Ste 600
Bremerton, WA 98337

FACILITIES: West Wastewater Treatment Plant
1600 Oyster Bay Road
Bremerton, Kitsap County

East Wastewater Treatment Plant
2475 Stephenson Avenue
Bremerton, Kitsap County

The City of Bremerton has reapplied for a National Pollutant Discharge Elimination System (NPDES) permit in accordance with the provisions of Chapter 90.48 Revised Code of Washington (RCW), Chapter 173-220 Washington Administrative Code (WAC), and the Federal Clean Water Act.

The City of Bremerton presently operates two wastewater treatment plants. The West Plant is an activated sludge, secondary treatment plant, which is designed to treat a maximum monthly flow of 10.1 million gallons per day. The East Plant operates only during wet weather periods and treats combined sewage only. The wastewater, following treatment, must meet the requirements of the Washington State Water Pollution Control Act and applicable regulations, for a permit to be issued. Following evaluation of the application and other available information, a draft permit has been developed which would allow the discharge of secondary treated municipal wastewater from the West Plant into Sinclair Inlet and the discharge of treated combined sewage from the East Plant into Port Washington Narrows.

A tentative determination has been made on the effluent limitations and special permit conditions that will prevent and control pollution. A final determination will not be made until all timely comments received in response to this notice have been evaluated.
